

# EQAT Registration and Installation on Mac

# Additional notes:

- Please make sure that the Setting 'Allow apps downloaded from:' is switched to 'App Store and identified developers' prior to any attempts,
- You are an admin user in 'User and Groups',
- You are on an Intel based Macintosh as EQAT might not be fully optimized for the newest M1 chips,
- Try restarting the Machine and playing with the settings involved.
  
- Some additional details you can find here: <https://support.apple.com/en-us/HT202491>
  
- In case nothing of the suggested works – try using Virtualization tools that support Windows like Parallels Desktop, Virtual Box etc.
  
- How can you run 32-bit EQAT application on macOS 10.15 or higher? The simple answer is that you can't natively run a 32-bit application on Catalina or Big Sur. There are a few options and workarounds that may prove helpful if you absolutely need to run a 32-bit application.
- Install an older version of macOS (Mojave or earlier) as a virtual PC using Parallels for Mac on your current macOS and then run your application through Parallels.
- Downgrade to macOS 10.14 Mojave or earlier.

Go to <https://eqat.wiley.com> and click the Request an Account button.

Fill in all fields in the form or at least the required ones. Then type the CAPTCHA and click to the Submit button.

The screenshot shows a web browser window with the URL `eqat.wiley.ru`. The page title is "WileyPLUS Question Authoring Tool" and the Wiley logo is in the top right. The main heading is "Request an Account".

The form fields are as follows:

First Name*:	Michael
Last Name*:	Tester
Email*:	mtester@wiley.com
Password*:	*****
Confirm Password*:	*****
Wiley Contact*:	My Contact
Institution/Company:	
Subject Area of Expertise:	

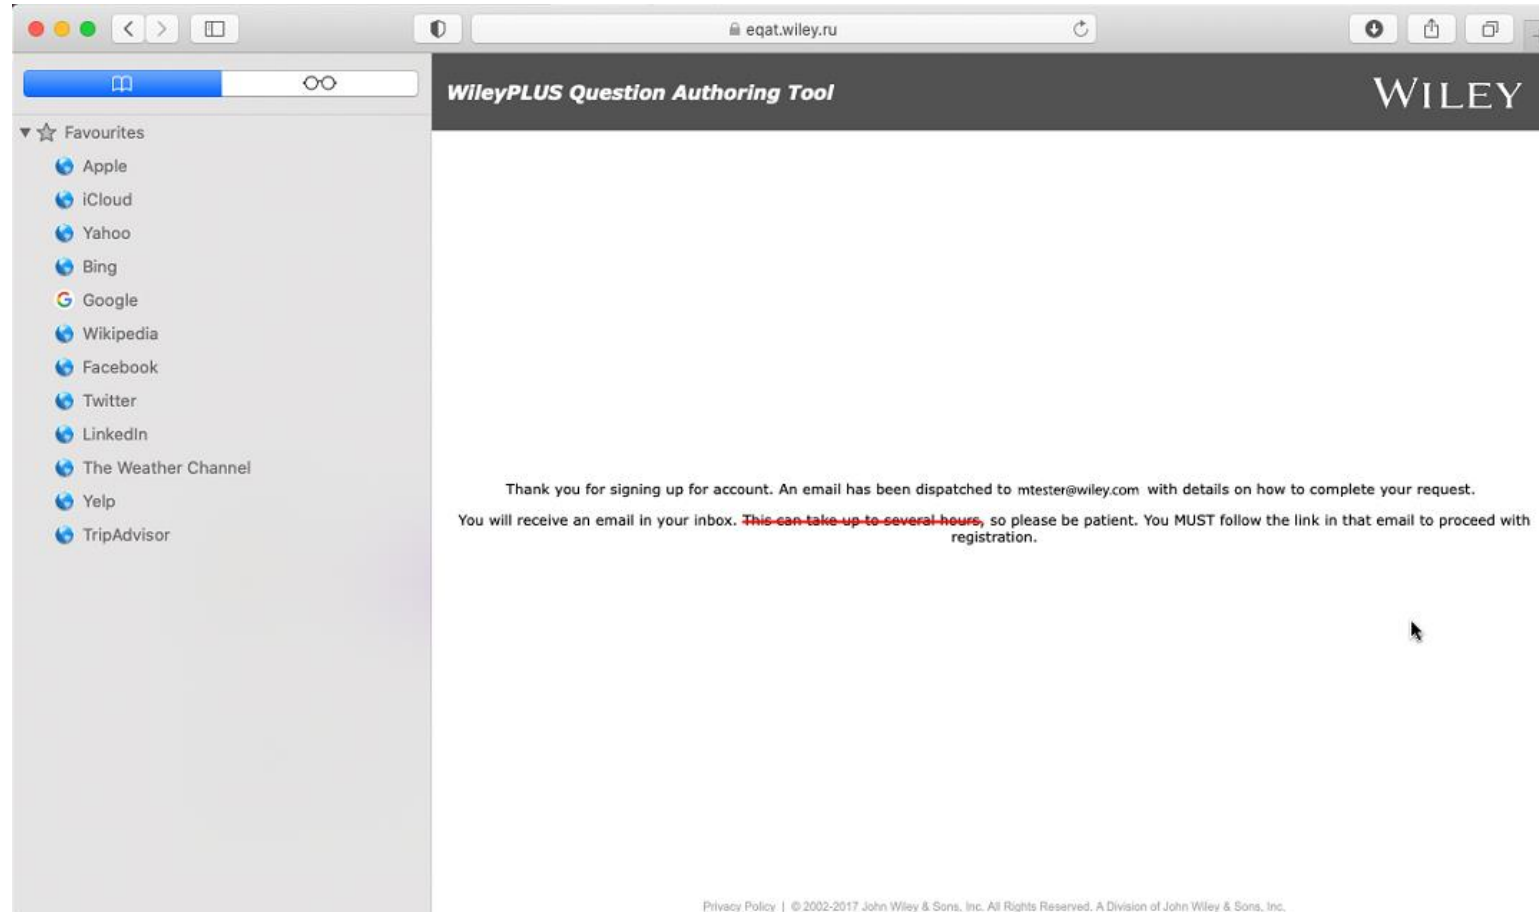

A red box highlights the entire form area. Below the form, a red box highlights the text "\*Required field".

Below the form is a CAPTCHA image showing the text "mdxd6" with a black scribble over it. To the right of the image is an input field containing the text "mdxd6". A red box highlights this input field.

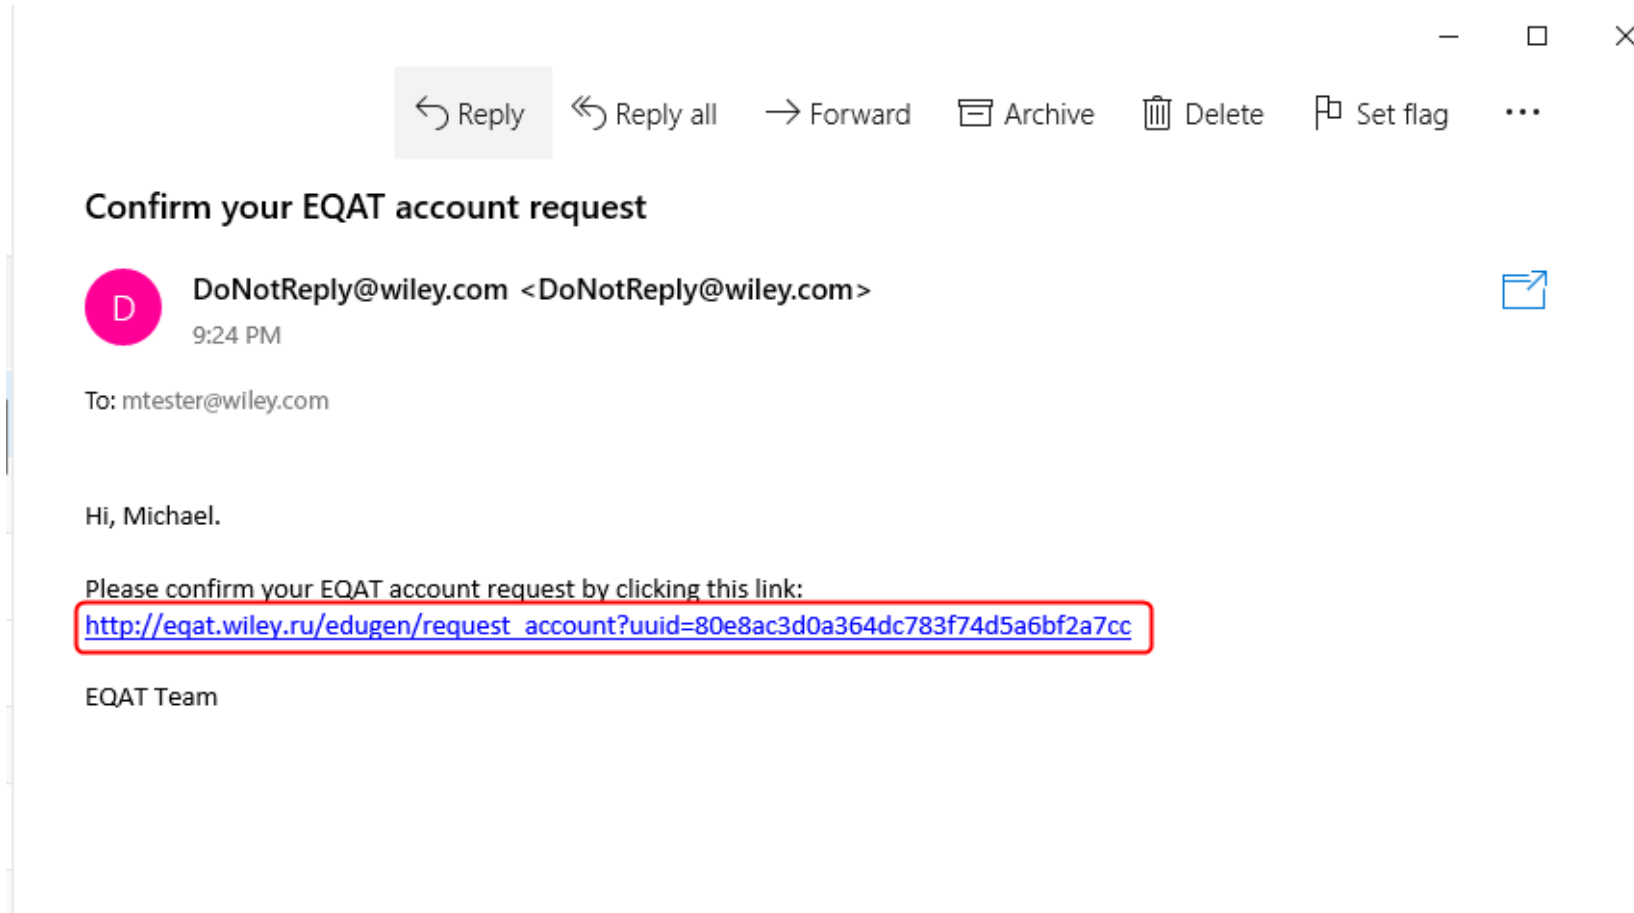

At the bottom right of the form are two buttons: "Cancel" and "Submit". The "Submit" button is highlighted with a red box.

At the bottom of the page, there is a footer: "Privacy Policy | ©2002-2017 John Wiley & Sons, Inc. All Rights Reserved. A Division of John Wiley & Sons, Inc."

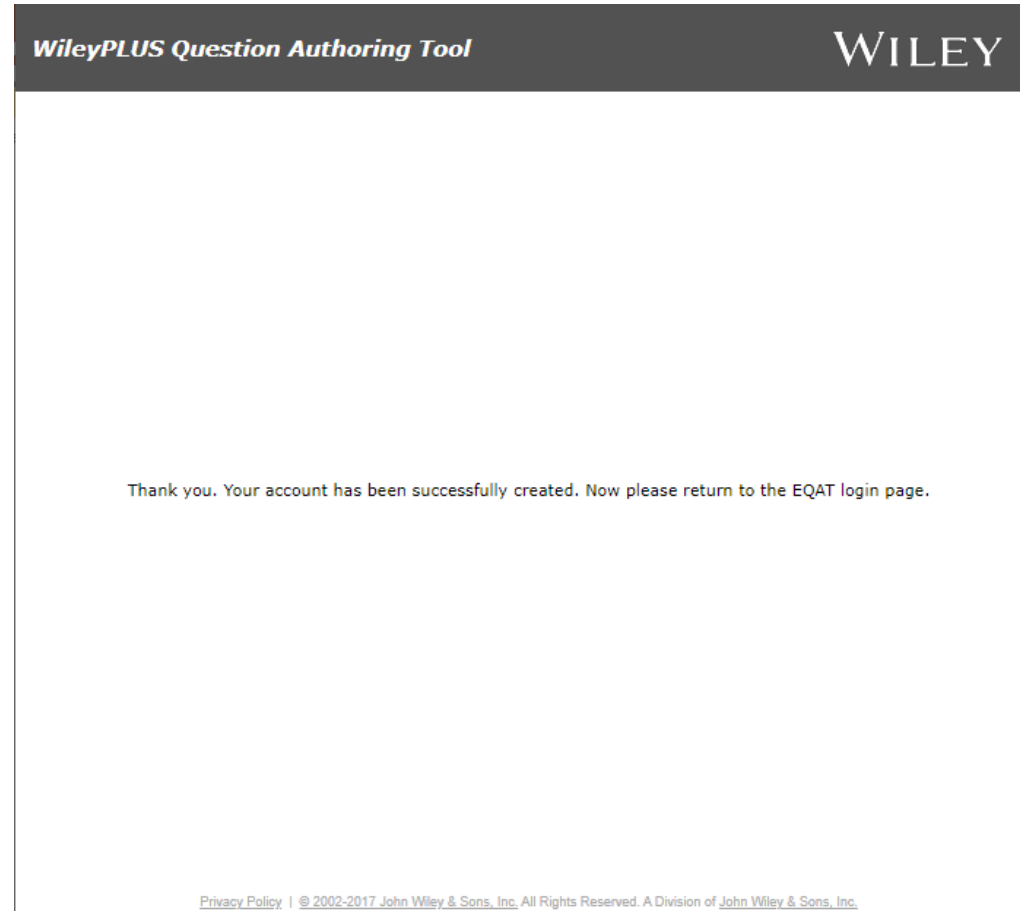

# You will get confirmation in email. Look in your mail Inbox (or in the Junk folder).

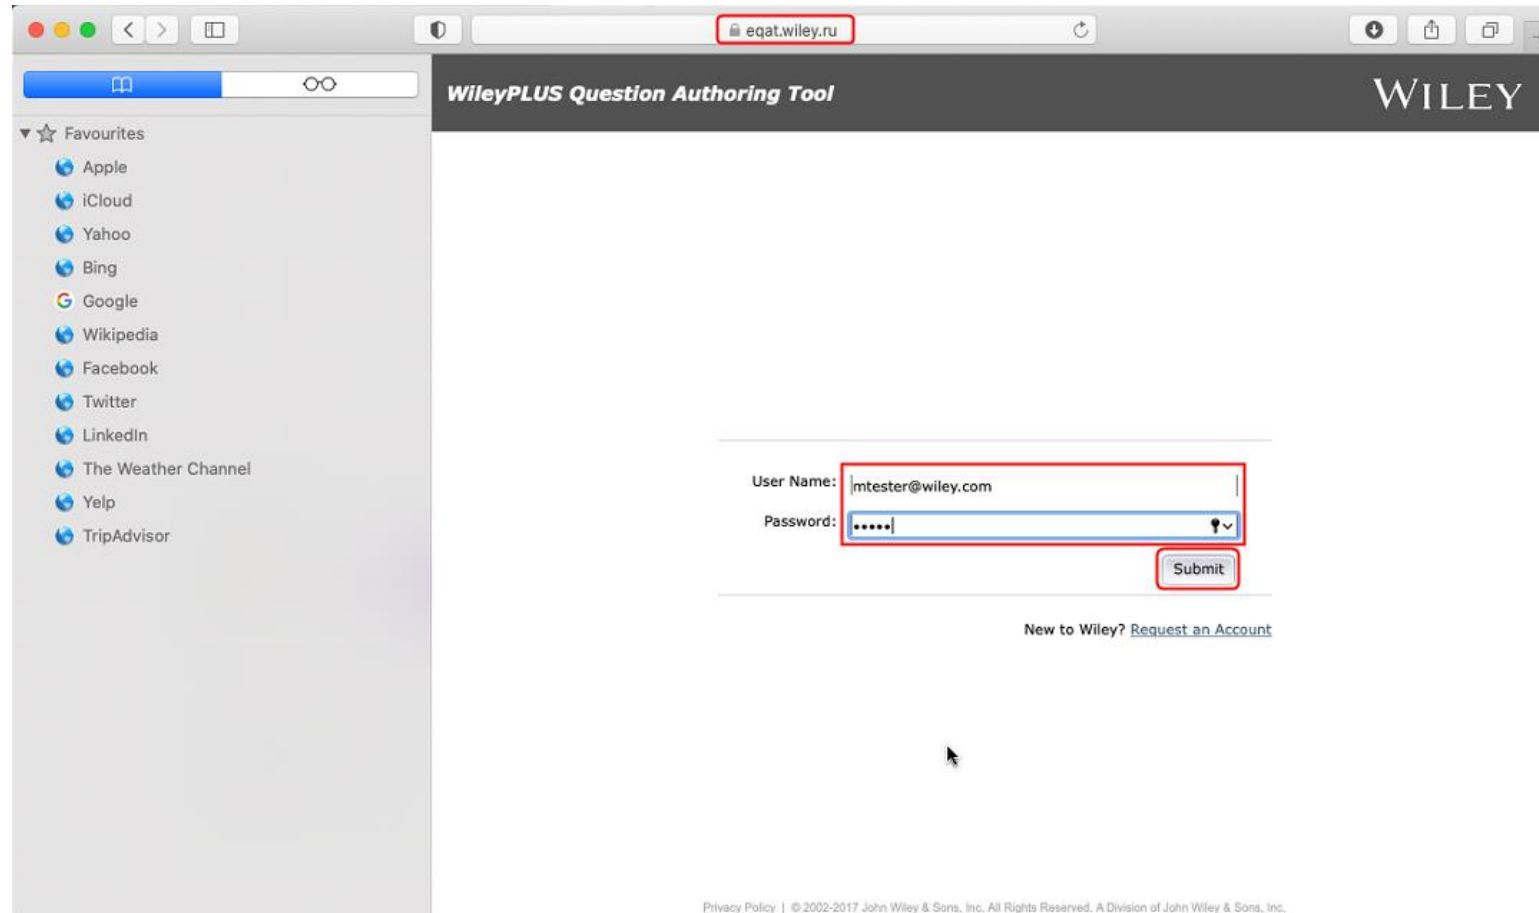

# Click to the link in the email from the EQAT server to confirm your account.

You will get confirmation of the successful registration.

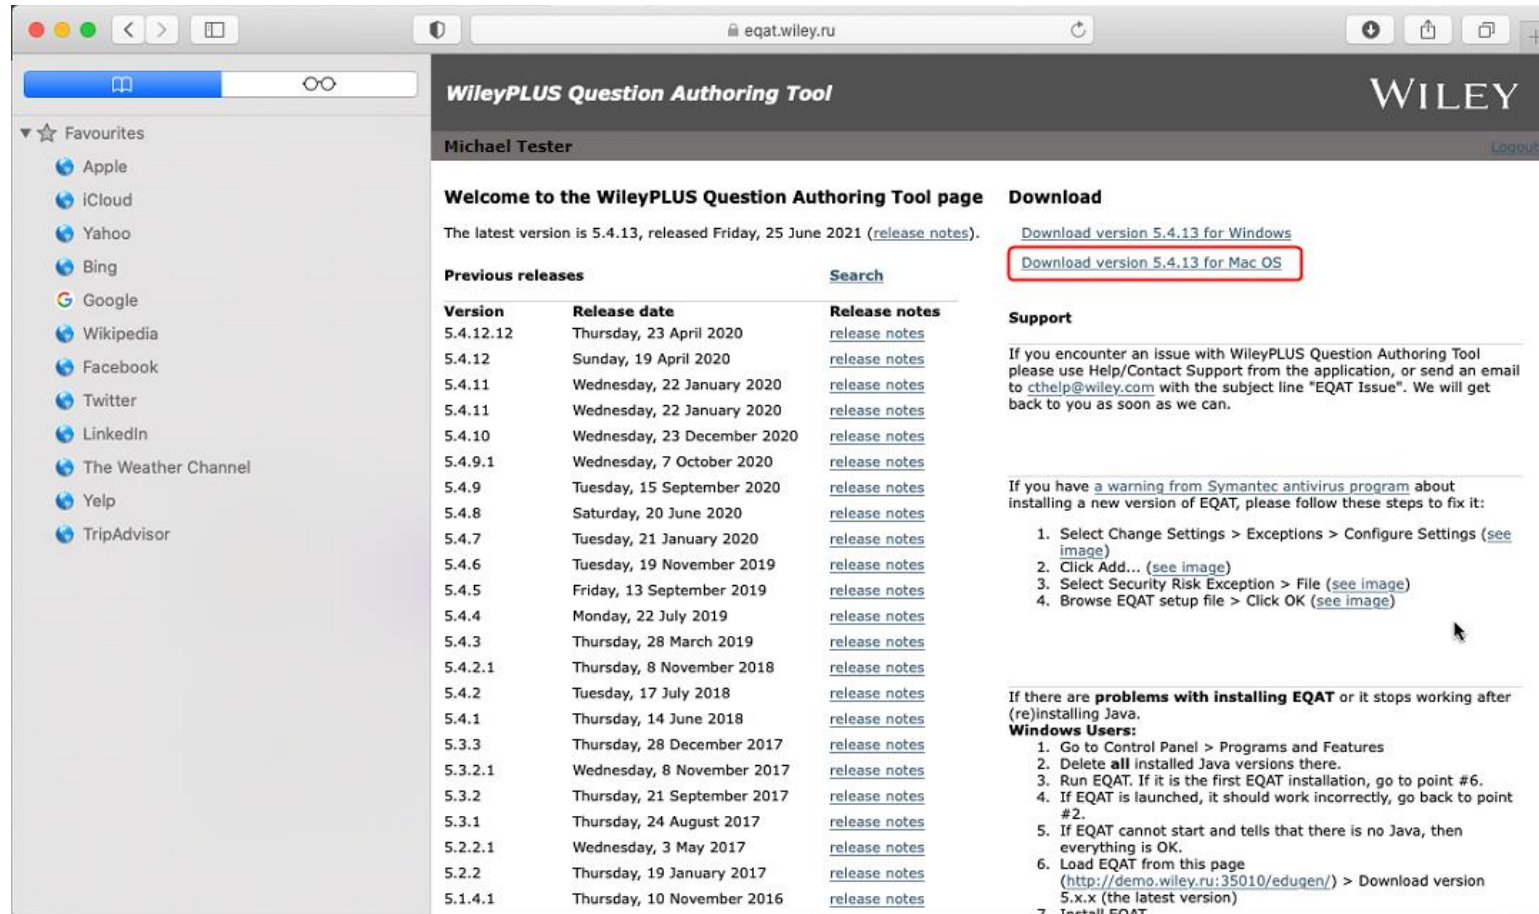

Go back to the EQAT login page. Type your email and password. Then click the Submit button.

# Download the latest version of EQAT for Mac OS.

Note, EQAT Mac version no longer supports Math Editor. If you need to have formulas in the question description, please install EQAT on some Windows machine.

The screenshot shows a web browser window displaying the WileyPLUS Question Authoring Tool page. The page title is "WileyPLUS Question Authoring Tool" and the user is logged in as "Michael Tester". The main content area includes a welcome message, a "Download" section with two links, and a "Support" section with troubleshooting instructions. The "Download" section has two links: "Download version 5.4.13 for Windows" and "Download version 5.4.13 for Mac OS", with the latter link highlighted by a red rectangular box. Below the "Download" section is a "Support" section with a heading and a paragraph of text. The "Support" section includes a list of steps to resolve a Symantec antivirus warning. The "Previous releases" section contains a table with columns for Version, Release date, and Release notes. The table lists releases from version 5.1.4.1 to 5.4.12.12. The "Favourites" sidebar on the left lists various websites like Apple, iCloud, Yahoo, Bing, Google, Wikipedia, Facebook, Twitter, LinkedIn, The Weather Channel, Yelp, and TripAdvisor.

**Welcome to the WileyPLUS Question Authoring Tool page**

The latest version is 5.4.13, released Friday, 25 June 2021 ([release notes](#)).

**Download**

[Download version 5.4.13 for Windows](#)

[Download version 5.4.13 for Mac OS](#)

**Support**

If you encounter an issue with WileyPLUS Question Authoring Tool please use Help/Contact Support from the application, or send an email to [cthelp@wiley.com](mailto:cthelp@wiley.com) with the subject line "EQAT Issue". We will get back to you as soon as we can.

If you have a warning from Symantec antivirus program about installing a new version of EQAT, please follow these steps to fix it:

1. Select Change Settings > Exceptions > Configure Settings ([see image](#))
2. Click Add... ([see image](#))
3. Select Security Risk Exception > File ([see image](#))
4. Browse EQAT setup file > Click OK ([see image](#))

If there are **problems with installing EQAT** or it stops working after (re)installing Java.

**Windows Users:**

1. Go to Control Panel > Programs and Features
2. Delete **all** installed Java versions there.
3. Run EQAT. If it is the first EQAT installation, go to point #6.
4. If EQAT is launched, it should work incorrectly, go back to point #2.
5. If EQAT cannot start and tells that there is no Java, then everything is OK.
6. Load EQAT from this page (<http://demo.wiley.ru:35010/edugen/>) > Download version 5.x.x (the latest version)
7. Install EQAT

If you encounter an issue with please use Help/Contact Support to [cthelp@wiley.com](mailto:cthelp@wiley.com) with the screenshot back to you as soon as we can.

If you have a warning from Symantec when installing a new version of EQAT:

Select Change Settings > (see image)  
Click Add... (see image)  
Select Security Risk Exception  
Browse EQAT setup file >

If there are problems with installing Java. (re)installing Java.

**Windows Users:**

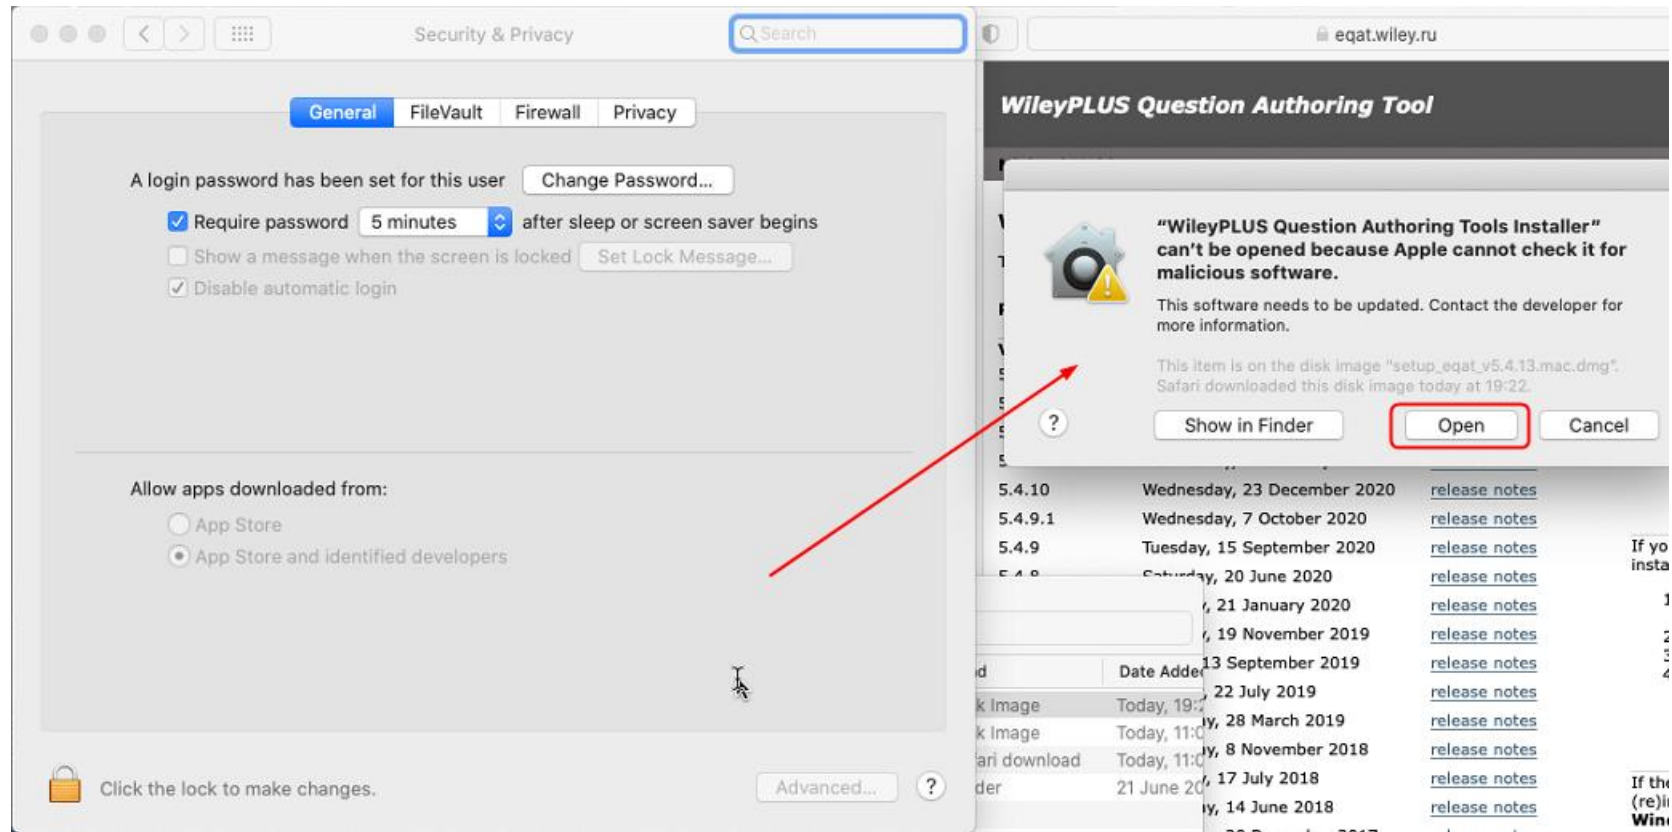

Go to Control Panel > Programs and Features  
Delete **all** installed Java versions  
Run EQAT. If it is the first time, it will install Java  
If EQAT is launched, it should show a warning about Java. If it does not, it is not installed.  
If EQAT cannot start and everything is OK, it is not installed.  
Load EQAT from this page (<http://demo.wiley.ru:3555.x.x> (the latest version))  
Install EQAT.

Go to System Preferences, then to Security & Privacy, (switch to App Store and identified developers), and finally click Open Anyway.

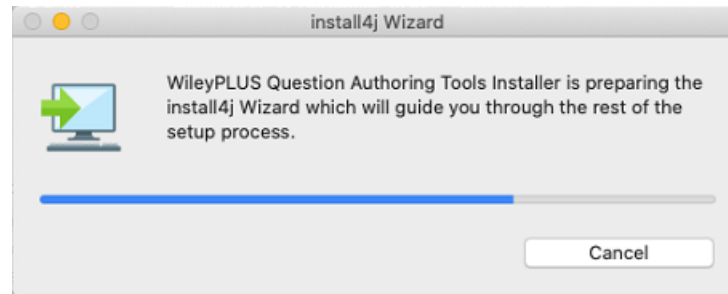

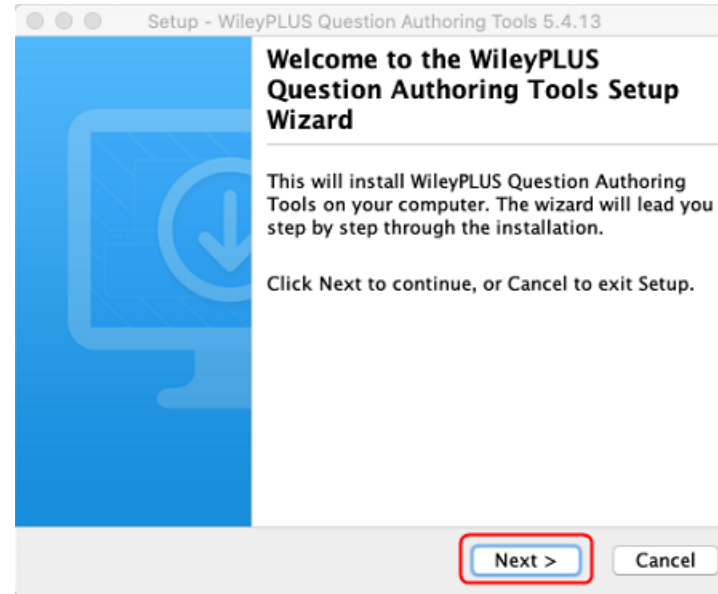

# Confirm to Open

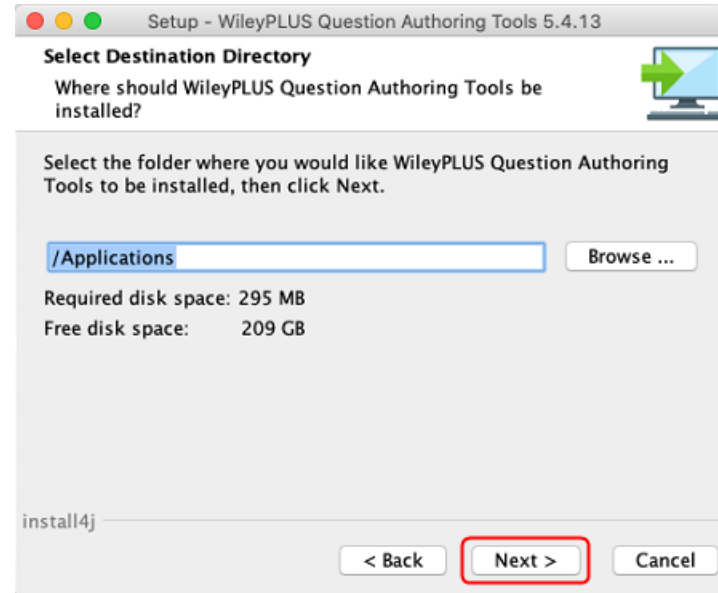

The process will start. Click Yes if the system asks for confirmation.

Click Next to continue.

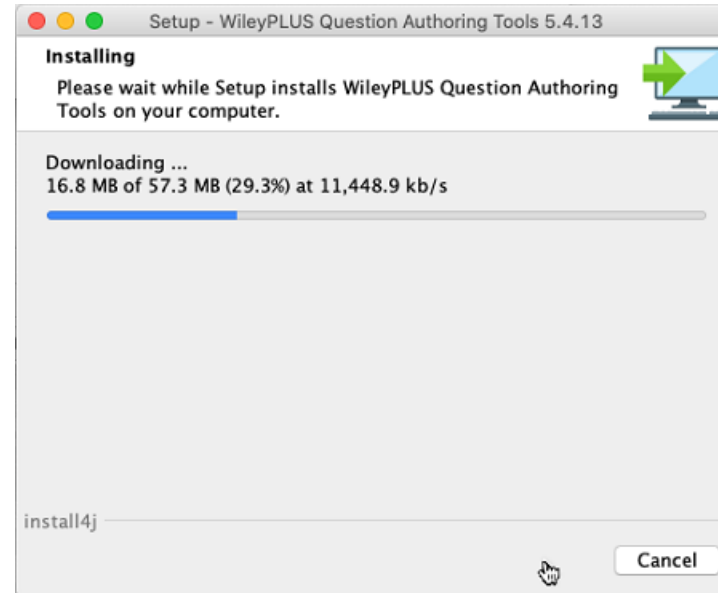

Click Next one more time (or change the destination folder before that).

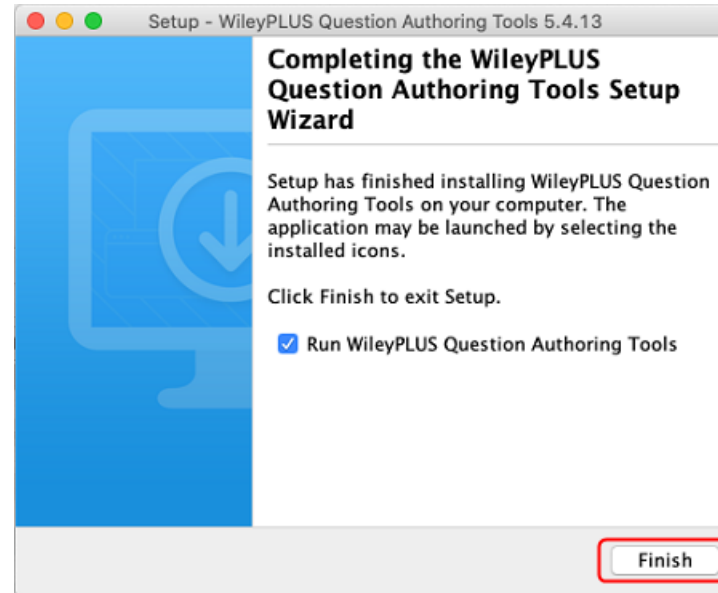

The progress will go on.

Click Finish button to complete the installation.

A new window of EQAT will be opened. All your previous question banks will be present. If there is the first time you use EQAT, the only Create New Package button will be available.
