Support

If you encounter an issue with WileyPLUS Question Authoring Tool please use Help/Contact Support from the application, or send an email to cthelp@wiley.com with the subject line "EQAT Issue". We will get back to you as soon as we can.

If you have a [warning from Symantec antivirus program](#) about installing a new version of EQAT, please follow these steps to fix it:

1. Select Change Settings > Exceptions > Configure Settings ([see image](#))
2. Click Add... ([see image](#))
3. Select Security Risk Exception > File ([see image](#))
4. Browse EQAT setup file > Click OK ([see image](#))

If there are **problems with installing EQAT** or it stops working after (re)installing Java.

Windows Users:

1. Go to Control Panel > Programs and Features
2. Delete **all** installed Java versions there.
3. Run EQAT. If it is the first EQAT installation, go to point #6.
4. If EQAT is launched, it should work incorrectly, go back to point #2.
5. If EQAT cannot start and tells that there is no Java, then everything is OK.

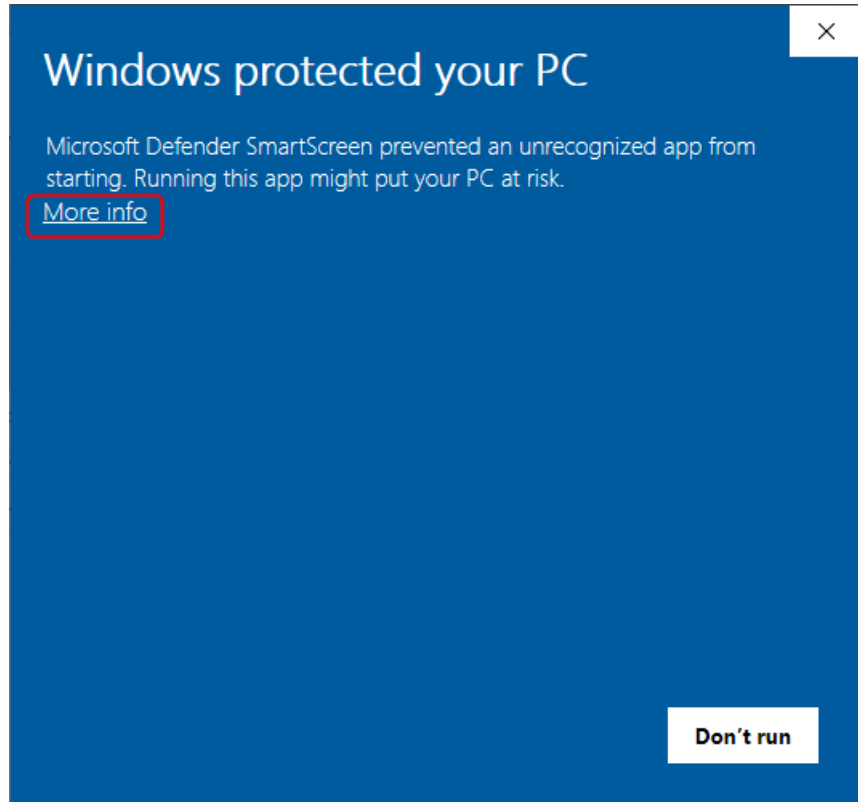

setup_eqat_v5.4.12...exe

File Explorer window showing the contents of a folder named "delete". The file "setup_eqat_v5.4.12.4.j32.exe" is highlighted with a red box.

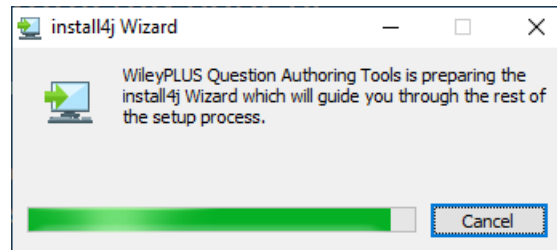

File Explorer window showing the contents of a folder named "delete". The file "setup_eqat_v5.4.12.4.j32.exe" is highlighted with a red box.

To oblige the security requirements, click to More info button. Then click to Run anyway button.

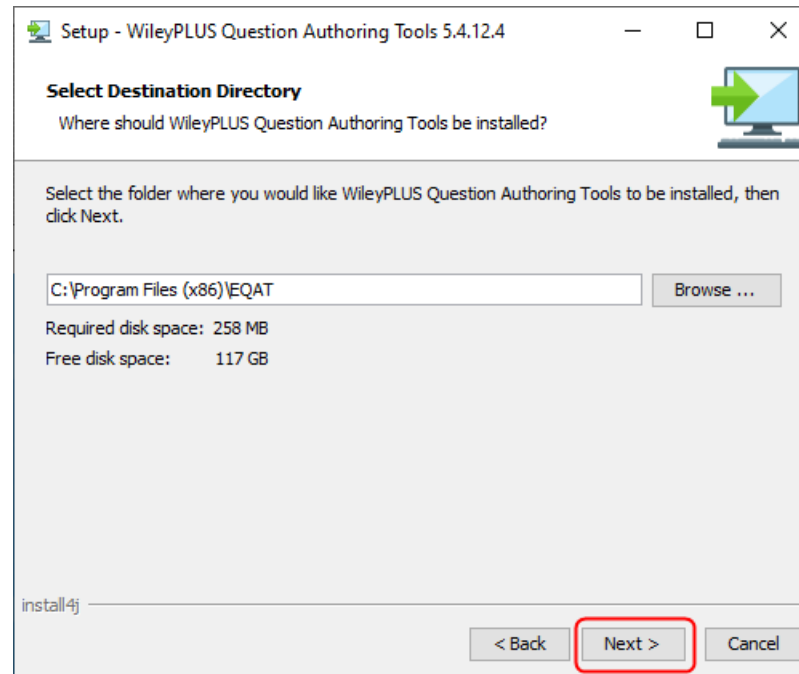

The process will start. Click Yes when the system asks for the confirmation.

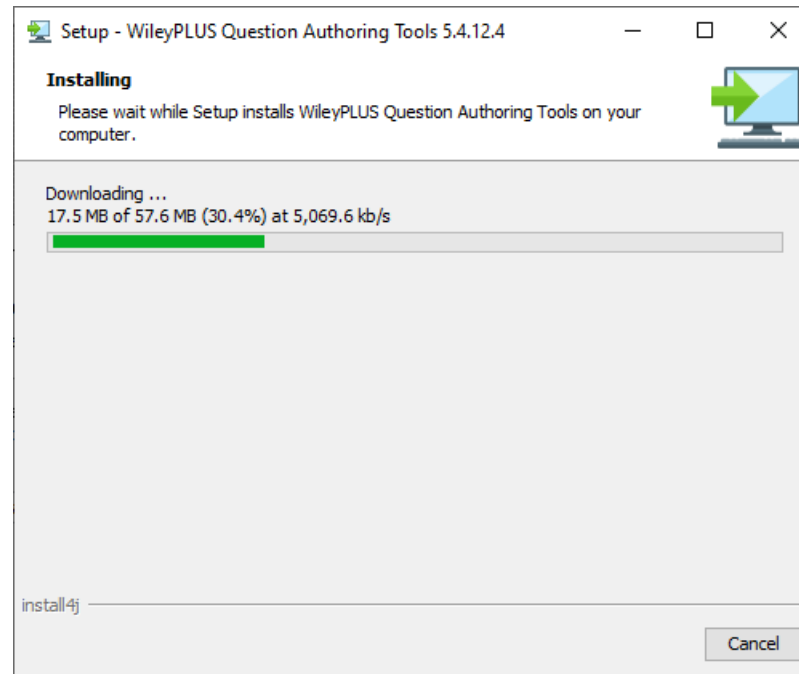

Click Next to continue.

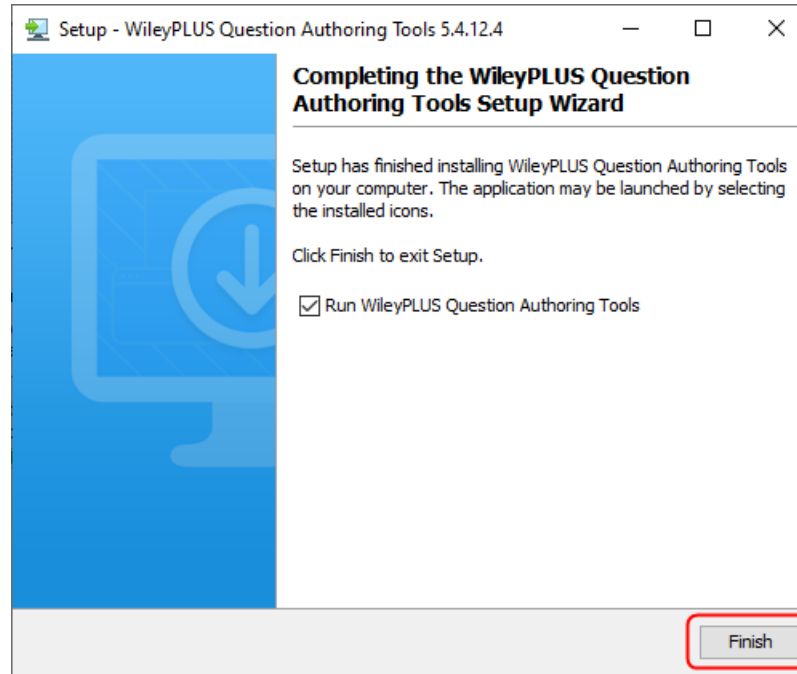

Click Next one more time (or change the destination folder before that).

The progress will go on.

Click Finish button to complete the installation.

A new window of EQAT will be opened. All your previous question banks will be present. If there is the first time you use EQAT, the only Create New Package button will be available.
